The Book of L G. Rozenberg 2012-12-06 This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been cus tomarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the in terest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and O (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

Elements of Dynamic Optimization Alpha C. Chiang 1999-12-22 In this text, Dr. Chiang introduces students to the most important methods of dynamic optimization used in economics. The classical calculus of variations, optimal control theory, and dynamic programming in its discrete form are explained in the usual Chiang fashion, with patience and thoroughness. The economic examples, selected from both classical and recent literature, serve not only to illustrate applications of the mathematical methods, but also to provide a useful glimpse of the development of thinking in several areas of economics.

Medical Anthropology Andrea S. Wiley 2009 Intended as the primary text for introductory courses on medical anthropology, this book integrates human biological data relevant to health and disease with both evolutionary theory and the social environments that more often than not produce major challenges to health and survival. Because students who take this fastest-growing anthropology course come from a variety of disciplines (anthropology, biology, especially pre-med students, and health sciences, especially), the text does not assume anything beyond a basic high-school level familiarity with human biology and anthropology. The authors first present basic biological information on a particular health condition and then expand their analysis to include evolutionary, historical, and cross-cultural perspectives. Among the topics covered are nutrition, infectious disease, stress, reproductive health, behavioral disease, aging, race/racism and health, mental health, and healers and healing.

Unraced... S S Collins 2007 Formula 1, the worlds most popular motor sport, from a totally new perspective ? Hidden in workshops around the world lie forgotten and abandoned machines ? unfulfilled. These purpose built cars have never started a race, never felt the excitement of a grand prix. Yet they define an era of Formula One, changing the landscape. Unraced tell the stories of nine grand prix cars that never started. An exciting and fresh look at F1 from the Author of Autodrome. The Unraced are largely forgotten or overlooked but the stories they have to tell reveal more about the sport than any championship winner, and or the first time these stories are told in a refreshing style, backed up with 150 photos, many never published before. The book covers Honda RC100/RC1.5x (1993-1995), Lola T95/30 (1995), DAMS GD-01 (1995), Honda RC2x (1995-1996), Dome F105 (1996), Lola T97/30 (1997), Honda RA099 (1999), Premier1 prototype (2001), McLaren MP4/18 (2003) and also includes a listing of all F1 projects (raced & unraced) from 1995 ? 2005. This book is completely incomparable and a must have for any motor sport enthusiast.

How People Tick Mike Leibling 2009-04-03 This new edition of How People Tick is a practical guide to over 50 types of difficult people such as Angry People, Blamers, Impatient People, Workaholics and Gossips. Each difficult situation is described, how it happens is analysed, and then strategies to help you deal with the problem are suggested. Disruptive behaviour patterns can be addressed once and for all, instead of having to handle one-off 'difficult' events, time and time again. Absolutely invaluable to everybody, How People Tick is full of tried and tested tips for handling 'difficult' people in 'difficult' situations, based on a real understanding of their behaviour. It is an essential read if you find people bewildering or just plain difficult, and yet still want to understand them, work with them and live with them.

Slave Stealers Timothy Ballard 2018-09-04 Follow two abolitionists who fought one of the most shockingly persistent evils of the world: human trafficking and sexual exploitation of slaves. Told in alternating chapters from perspectives spanning more than a century apart, read the riveting 19th century first-hand account of Harriet Jacobs and the modern-day eyewitness account of Timothy Ballard. Harriet Jacobs was an African-American, born into slavery in North Carolina in 1813. She thwarted the sexual advances of her master for years until she escaped and hid in the attic crawl space of her grandmother's house for seven years before escaping north to freedom. She published an autobiography of her life, Incidents in the Life of a Slave Girl, which was one of the first open discussions about sexual abuse endured by slave women. She was an active abolitionist, associated with Frederick Douglass, and, during the Civil War, used her celebrity to raise money for black refugees. After the war, she worked to improve the conditions of newly-freed slaves. As a former Special Agent for the Department of Homeland Security who has seen the horrors and carnage of war, Timothy Ballard founded a modern-day "underground railroad" which has rescued hundreds of children from being fully enslaved, abused, or trafficked in third-world countries. His story includes the rescue and his eventual adoption of two young siblings--Mia and Marky, who were born in Haiti. Section 2 features the lives of five abolitionists, a mix of heroes from past to present, who call us to action and teach us life lessons based on their own experiences: Harriet Tubman--The "Conductor"; Abraham Lincoln--the "Great Emancipator"; Little Mia--the sister who saved her little brother; Guesno Mardy--the Haitian father who lost his son to slave traders; and Harriet Jacobs--a teacher for us all.

After the Dream Stan Mason 2013-12-09 Diana is married to a high-ranking Civil Servant who is a workaholic and he neglects her badly. Diana takes part in an experiment after receiving hospital treatment on her holiday. In due course, she notices that everyone else is getting old but she is still remaining young and beautiful. When she visits the scientist, he tells her that the experiment is one where, if successful, she will live to almost two hundred years of age and remain exactly as she looks at present for all that time.

The Great University Gamble Andrew McGettigan 2013-04-09 In 2010 the UK government proposed huge cuts and market-driven reforms for Universities. The proposals provoked widespread opposition in the form of street protests, occupations, and online campaigns. As the dust settles, Andrew McGettigan surveys the emerging brave new world of Higher Education. Displaying a stunning grasp of the policy details, he looks at the long term impact of the changes, which have been obscured by the focus on tuition fee increases. What will be the role of universities within society? How will they be funded? What kind of experiences will they offer students? Written in a clear and engaging style, The Great University Gamble outlines the architecture of the new policy regime, which many find difficult to grasp. It is an urgent warning that our Universities are being transformed from institutions of real learning to profit-driven degree factories.

Mechanics of Materials Andrew Pytel 2011-01-01 The second edition of MECHANICS OF MATERIALS by Pytel and Kiusalaas is a concise examination of the fundamentals of Mechanics of Materials. The book maintains the hallmark organization of the previous edition as well as the time-tested problem solving methodology, which incorporates outlines of procedures and numerous sample problems to help ease students through the transition from theory to problem analysis. Emphasis is placed on giving students the introduction to the field that they need along with the problem-solving skills that will help

them in their subsequent studies. This is demonstrated in the text by the presentation of fundamental principles before the introduction of advanced/special topics. Crochet Animal Slippers Ira Rott 2021-03-09 Create animal slippers for the whole family, with this cute collection of patterns from leading crochet designer Ira Rott. First choose your slipper type – slide, shoe or boot – then choose your size, and finally choose one of 20 different animal designs. This adorable book will have you reaching for your hook and crocheting the most appropriate animals for your tribe. Why not try the elephants for grandpa (who sometimes forgets), the pandas for mum (whose mascara always runs) and the bears for the little one who loves warm hugs... there are options to delight them all and keep you in handmade gifts to give for years! Ira Rott is well known for her gorgeous animal designs and her easy-to-follow crochet patterns, which include step-by-step photographs for any fiddly parts, and crochet charts alongside the written patterns. She expertly guides you through making three different kinds of crochet slippers – shoes with covered heels, boots with ankle cuffs, and slides which are backless slippers. Knowing what size to make is made easy thanks to a clever measuring chart at the front of the book. Simply open the flap, put your foot on the measuring gauge and instantly see what size you need. In the book are useful tables that show how much yarn and what size hook you will need for each size. Complete step-by-step instructions and charts then show you how to master each slipper type, with templates for adding non-slip soles to your crochet slippers too. Once you've mastered the slipper-making, the fun begins in creating your crochet animal designs. Choose from: the Snuggly Pug, the Cuddly Bear, the Happy Penguin, the Zingy Dinosaur, the Starry Unicorn, the Rock 'n' Roll Panda, the Sleepy Koala, the Mossy Sloth. the Graceful Elephant, the Playful Pig, the Mischievous Raccoon, the Cheeky Monkey, the Woolly Sheep, the Sandy Turtle, the Sassy Cat, the Hippie Llama, the Brave Moose, the Artful Fox, the Friendly Cow and the Roaring Lion. But that's not all – Ira also shows you how you can mix and match patterns to create all sorts of new animals too. Add the unicorn horn to the cat for a cute uni-kitty, and mix the dinosaur and the penguin to create a wise owl – once you've discovered that you can customize your crochet slippers you'll be able to create unlimited options!
