Research Methods in Education and Psychology Donna M Mertens 1998 Focused on providing as full a picture as possible of what is considered to be "good" research, Research Methods in Education and Psychology explains quantitative and qualitative methods and incorporates the viewpoints of various research paradigms into the descriptions of these methods. It not only covers two of the standard paradigms (postpositivist and interpretive/constructivist) but also a relatively new emancipatory paradigm that is inclusive of the perspectives of feminists, ethnic/racial minorities, and persons with disabilities. In each chapter, Donna M. Mertens carefully explains a step of the research process from the literature review to types of research method to analysis and reporting of quantitative or qualitative approaches. As an added plus, she includes a sample study and abstract in each chapter to illustrate the concepts discussed in that chapter. To enhance your students reading, she has also included: - Chapter opening examples and lists of topics to consider - Boxed examples and points to consider - Sample studies in every chapter to illustrate key ideas - Sequence steps to guide each stage of the research process - End-of-chapter "Questions and Answers for Discussion and Application" to elicit further reflection of the material covered

Psychological Testing in the Service of Disability Determination Institute of Medicine 2015-06-29 The United States Social Security Administration (SSA) administers two disability programs: Social Security Disability Insurance (SSDI), for disabled individuals, and their dependent family members, who have worked and contributed to the Social Security trust funds, and Supplemental Security Income (SSSI), which is a means-tested program based on income and financial assets for adults aged 65 years or older and disabled adults and children. Both programs require that claimants have a disability and meet specific medical criteria in order to qualify for benefits. SSA establishes the presence of a medically-determined impairment in individuals with mental disorders other than intellectual disability through the use of standard diagnostic criteria, which include symptoms and signs. These impairments are established largely on reports of signs and symptoms of impairment and functional limitation. Psychological Testing in the Service of Disability Determination considers the use of psychological tests in evaluating disability claims submitted to the SSA. This report critically reviews selected psychological tests, including symptom validity tests, that could contribute to SSA disability determinations. The report discusses the possible uses of such tests and their contribution to disability determinations. Psychological Testing in the Service of Disability Determination discusses testing norms, qualifications for administration of tests, administration of tests, and reporting results. The recommendations of this report will help SSA improve the consistency and accuracy of disability determination in certain cases.

Wastewater Treatment Glenn M. Tillman 1996-08-01 Wastewater Treatment is another indispensable work from the author of Water Treatment. Both books are helpful tools for crisis identification and, most importantly, resolution. Tillman writes in a concise, well organized format - perfect for fast reference. This operator's guide presents basic troubleshooting and problem solving information for typical problems that can occur during the operation of processes used at municipal and industrial wastewater treatment plants. Common problems and the recommended operator responses are listed in tabular form for individual unit processes. Entry level operators will benefit greatly from the problems Tillman addresses, while experienced operators will appreciate it as a handy reference. The information compiled in this volume has been collected from various equipment manufacturers' operation and maintenance manuals, U.S. Environmental Protection Agency (EPA) technology transfer documents, the authors personal experience as a plant Operations and Maintenance manual writer, and his experience as a plant manager and operator. He includes only the most common wastewater treatment unit processes. He gives an overview of the treatment objective of the unit process, and then provides each with a troubleshooting table divided into Indicators/Observations: Possible Cause; Check or Monitor; Possible Solutions columns. Wastewater Treatment reads like the best of training manuals. Tillman's know-how, combined with his clarity, make this book required occupational reading. The brief, straightforward format and easy-to-read tables make the guide an accessible problem solving reference.

Strengthening Forensic Science in the United States National Research Council 2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Influential Ghosts Rachel Wetzsteon 2007 Influential Ghosts: A Study of Auden's Sources explores some of the most important literary and philosophical influences on W.H. Auden's poetry. The study attempts to show that Auden's poetry derives much of its interest from the vast range of authors on whom he drew for inspiration. But it also suggest that his relationship to these writers was marked by a fascinating ambivalence. In chapters on Auden's relationship to Hardy and Kierkegaard, the study shows how, after lovingly apprenticing himself to their work and often borrowing stylistic or thematic features from it - Hardy's sweeping "hawk's vision," Kierkegaard's urgent "leap of faith" - he began to criticize the very things he had previously striven to emulate. In a chapter on Auden's elegies, the author argues that, alone among examples of this poetic genre, they both reverently mourn and harshly scrutinize their subjects (Yeats, Freud, Henry James and others). In a chapter on "structural allusion" in Auden's early poetry, the study posits that Auden singlehandedly invented a new kind of allusion in which he alludes to the form and subject matter of entire poems. But while doing so, he also finds fault with the attitudes (passivity, despair) depicted in them. In these structurally allusive poems - as with his relationship to Hardy, Kierkegaard and his elegies' subjects - Auden's sometimes accepting, sometimes skeptical attitude toward his poetic models is on powerful display, and finds a perfect counterpart in the tension between imitative form and critical content.

The North of England Home Service Gordon Burn 2003 Spring 2001, and the countryside of the North East of England resembles Fitzgerald's 'valley of ashes'; the air is choked with the stench and smoke of the pyres which are burning in an attempt to contain the epidemic of foot and mouth disease. After forty years away, Ray Cruddas, a comedian with a national, considerably faded reputation, has returned to the North East to live. He has a new wife, a new club and a house close to a stand of trees which has haunted him from childhood. But he still believes he is living life at one remove, through the more vibrant, seemingly less complex and conflicted person of Jackie Mabe, the former boxer who, in his capacity as driver, drinking partner and gofer, has always stood between Ray Cruddas and the world. Jackie Mabe performed this role once before; for Jack Solomons, known as 'Jolly Jack' and 'the potentate', who ruled British boxing in the decades before and after the War. Along with the Victorian painter Ralph Hedley, the Geordie comic Bobby Thompson, and Margaret Thatcher's director of communications Gordon Reece, Solomons is among the many real life figures who populate this extraordinary blend of fact and fiction.

Cycle Infrastructure Design Great Britain. Department for Transport 2008 Encouraging more people to cycle is increasingly being seen as a vital part of any local authority plan to tackle congestion, improve air quality, promote physical activity and improve accessibility. This design guide brings together and updates guidance previously available in a number of draft Local Transport Notes and other documents. Although the focus is the design of cycle infrastructure, parts of its advice are equally appropriate to improving conditions for pedestrians. Individual chapters cover: general design parameters; signing issues; network management; reducing vehicle speeds on cycle routes; bus and tram routes; cycle lanes; off-road cycle routes; junctions; cycle track crossings; cycle parking; public transport integration. A list of references and an appendix of related publications complete the book. It is hoped that, by bringing together relevant advice in a single document, this guide will make it easier for local authorities to decide what provision, if any, is required to encourage more people to cycle.
