Airdrop of Supplies and Equipment 1975 Container loads are loads that are rigged for airdrop in airdrop containers such as the A-7A cargo sling, the A-21 cargo bag, and the A-22 cargo bag. In addition, flat steel strapping is used to rig container loads. The containers are packed with supplies, disassembled equipment, or small items of ready-to-use equipment prepared for airdrop. The container load requires cushioning material such as honeycomb, felt, or

cellulose wadding, depending on the load requirements and the method of airdrop. The number and types of parachutes required to stabilize and retard the descent of the load depends on the type of container used, the weight of the load, and the type of airdrop.

Defending Air Bases in an Age of Insurgency Shannon Caudill 2014-08 This anthology discusses the converging operational issues of air base defense and counterinsurgency. It explores the diverse challenges associated with defending air assets and joint personnel in a counterinsurgency environment. The authors are primarily Air Force officers from security forces, intelligence, and the office of special investigations, but works are included from a US Air Force pilot and a Canadian air force officer. The authors examine lessons from Vietnam, Iraq, Afghanistan, and other conflicts as they relate to securing air bases and sustaining air operations in a high-threat counterinsurgency environment. The essays review the capabilities, doctrine, tactics, and training needed in base defense operations and recommend ways in which to build a strong, synchronized ground defense partnership with joint and combined forces. The authors offer recommendations on the development of combat leaders with the depth of knowledge, tactical and operational skill sets, and counterinsurgency mind set necessary to be effective in the modern asymmetric battlefield.
