The Devolution Gambit Tim Niendorf 2021-05-19 This book examines the increasing territorialisation of party competition and the relaxation of unitarian rule through devolution, presenting a long-term analysis of electoral developments in the United Kingdom since the end of the Second World War. Subsequently, the book looks into the undermining of the traditional majoritarian mode of British government as a result. It analyzes the significant role of these long-term developments and their detrimental effect on the parliament's ability to resolve issues like the Scottish Independence Referendum or the UK's vote to leave the European Union, and it addresses their underlying causes. The author additionally reconnects these electoral developments to the changing nature of devolution and shows how the deepening of devolution accelerates the negative electoral consequences for the British system of government. Finally, the book shows why the British Labour Party is turning more and more into a long-term minority party as a result of these developments. The book is a must-read for scholars, students and policy-makers, interested in a better understanding of comparative politics and devolution in general, as well as in the more specific case of the United Kingdom's electoral system.

Composing Research, Communicating Results: Writing the Communication Research Paper provides communication students with the knowledge and necessary tools to compose a variety of course-required papers that are scholarly, accessible, and well-written. Chapter coverage includes common myths associated with writing a research paper, brainstorming and researching topics, making and supporting arguments, style and formatting issues, writing the literature review, application and personal reaction papers, empirical research papers, presenting and publishing your work, and more. Each stage of the process is broken down into easy-to-follow steps supported by writing exercises and numerous examples drawn from published and student-written papers in the field. Composing Research, Communicating Results: Writing the Communication Research Paper fulfils an important and underserved niche in the classroom curricula, and is an essential resource for all students in communications-related courses"--

Quest for Space: The Indian Connect 2014-02-15 Human endeavours in space over the past six decades have reached a stage that just about every facet of human life today has some complement of space capability contributing to it, encompassing the entire spectrum from telecommunications, navigation, weather forecasting, remote sensing, broadcasting and disaster management. Space exploration actually owes its origins to matters military, with civil applications coming about as a by-product. Capability

building in space thereafter has witnessed frenzied progress, in the spheres of both the military and the civil/commercial. With an ever increasing number of countries joining the space bandwagon, space is getting congested and competitive. International legislation on space, though well meaning, is largely viewed to be inadequate to address the concerns of equitable access to space and more alarmingly, is reticent on the issue of militarisation and weaponisation. The Indian presence in the global space order is rather significant. Ranking sixth globally in terms of space budget and technological capability, India is capable of going beyond its calling. Its multi-dimensional space programme spans almost the entire spectrum from space launch to satellite construction and their employment in a large array of development-centric applications, and in recent years, in missions beyond the Earth. The Mangalyaan mission to Mars currently underway symbolises India's indigenous technological prowess and is a harbinger of its capability of cementing its status as a responsible space player at the global level. India, thus, stands today, technologically robust and self-reliant – well poised in the global space order to look beyond its domestic charter and address the concerns of the international global community. Space legislation, situational awareness and international cooperation in space security are some of the geostrategic options analysed in this book, which could facilitate Indian positioning in the global space order.

Regulating Information Asymmetry in the Residential Real Estate Market Devin Lin 2017-07-06 This book conducts a detailed examination of the current form of the Hong Kong residential property regulatory system: the 2013 Residential Properties (Firsthand Sales) Ordinance (Cap 621). The author sheds light on how the new legislation promotes a number of values including information symmetry, consumer protection, the free market and business efficacy. It provides a detailed account of how the regulatory mechanism has evolved over the past three decades to catch unconscionable sales tactics (such as selective information and/or misrepresentation of location, size, completion date and past transactions) and monitor sales practices in order to protect the interests of stakeholders in this ever-changing first-hand residential property market. This book breaks down this complicated subject matter by focusing a number of chapters each on a specific attribute of the residential property on sale. It then examines the various channels through which the information is communicated to the prospective buyer and discusses misrepresentation of the key information in sales of residential properties as criminal liability. The tension between consumer's rights on one hand and the pursuit of free market principles on the other is but one example of the conflicting values thoroughly discussed in the book, others include superstition vs. modernization and clarity vs. flexibility. Aimed at those with an interest in consumer protection and transparency-orientated legislation in commercialized real estate transactions, this book seeks to provide an in-depth discussion of the latest trends and directions of travel.

Decision-making in Foreign Policy and India–China Bilateral Relations Raviprasad Narayanan 2021-11-29 Categorizing the centrality of foreign policy decision-making as being intrinsic to external relations, China and India are evolving new methodologies enriching the making of foreign policy. In comparison to works on China's foreign policy decision-making, India has not been studied much. Decision-making in Foreign Policy and India-China Bilateral Relations explains theoretical frameworks influencing decision makers with examples of the two countries and their decision-making regarding other countries and concerning issues with global impact. The book argues that climate change is a factor convincing both countries to look beyond established shibboleths. It unravels the inconsistencies in the policymaking processes in both countries. Discussing cooperation and possible conflict in the India-China bilateral afresh, the book introduces a

The Europeanisation of Contested Statehood George Kyris 2016-03-09 The Europeanisation of Contested Statehood: The EU in northern Cyprus acts as a case study of the impact of the EU on institutions, political parties and civil society in 'contested states', self-declared states which remain unrecognised in world politics. Research drawn from qualitative analysis of official documents, public discourse and interviews with various officials and political and social elites within the EU and at a local level provides new insights as to the impact of the EU on northern Cyprus as well as a fresh understanding of the relevance of the EU to contested states in general. By doing so, the book reflects on what contested statehood means for Europeanisation and lays out a conceptual template for the study of contested states of the wider European periphery, such as those in the Caucasus, Transnistria, Kosovo

or the occupied Palestinian territories, which continue to represent specific challenges to the international affairs of the EU.

On War and Democracy Christopher Kutz 2020-04-28 On War and Democracy provides a richly nuanced examination of the moral justifications democracies often invoke to wage war. In this compelling and provocative book, Christopher Kutz argues that democratic principles can be both fertile and toxic ground for the project of limiting war's violence. Only by learning to view war as limited by our democratic values—rather than as a tool for promoting them—can we hope to arrest the slide toward the borderless, seemingly endless democratic "holy wars" and campaigns of remote killings we are witnessing today, and to stop permanently the use of torture and secret law. Kutz shows how our democratic values, understood incautiously and incorrectly, can actually undermine the goal of limiting war. He helps us better understand why we are tempted to believe that collective violence in the name of politics can be legitimate when individual violence is not. In doing so, he offers a bold new account of democratic agency that acknowledges the need for national defense and the promotion of liberty abroad while limiting the temptations of military intervention. Kutz demonstrates why we must address concerns about the means of waging war—including remote war and surveillance—and why we must create institutions to safeguard some nondemocratic values, such as dignity and martial honor, from the threat of democratic politics. On War and Democracy reveals why understanding democracy in terms of political agency, not institutional process, is crucial to limiting when and how democracies use violence.

2012 GCSE English results Great Britain: Parliament: House of Commons: Education Committee 2013-06-11 The 2012 GCSE English results prompted significant controversy, which ultimately resulted in an

application for judicial review. This report sets out the background to these events and identifies lessons to be learned. The problems with GCSE English can be traced back to the 2007-09 development phase of the qualification- in particular the turbulence which resulted from the shift away from a mostly linear to a modular system, combined with a high proportion of controlled assessment and generous marking tolerances. Exam board experts raised concerns at the time, but these were not acted upon by the regulator (the then-interim Ofqual). Further difficulties arose because of pressures from the school accountability system. The problems experienced with GCSE English in 2012 highlighted serious weaknesses in the moderation of speaking and listening, with consequences for grade awarding. The current status of Ofqual, as an independent regulator accountable to Parliament, is the right one. However, the Coalition Government is bringing in wholesale changes to GCSEs and A levels, to a tight timetable and at the same time. Ofqual must have systems in place. The Committee is also concerned that there is a rush towards separate exam systems for England, Wales and Northern Ireland, without careful reflection on what might be lost, or consensus that this is the right thing to do.

The Power of Names in Identity and Oppression Robin Phelps-Ward 2022-11-18 Stories and personal narratives are powerful tools for engaging in self-reflection and application of critical theory in higher educational contexts. This edited text centers "name stories" as a vehicle to promote readers' understanding of social identity, oppression, and intersectionality in a variety of educational contexts from residence halls and classrooms to faculty development workshops and executive leadership board rooms. The contributors in this volume reveal how names may serve as entry points through which to foster learning and facilitate conversations about identity, power, privilege, and systems of oppression. Through an intersectional perspective, chapter authors reveal interlocking systems of oppression in education while also providing recommendations, lessons learned, reflection questions, and calls to action for those working to transform and advance equity-minded campus climates. This unique volume is for educators at colleges and universities doing equity work, seeking ways to initiate, facilitate, and maintain rich conversations about identity.

China's Domestic and International Migration Development Huiyao Wang 2019-03-09 This book offers the most comprehensive, up-to-date assessment of China's domestic and international migration. Restructuring economic development requires large numbers of educated and skilled talents, but this effort comes at a time when the size of China's domestic workforce is shrinking. In response, both national and regional governments in China have been keen to encourage overseas Chinese talents and professionals to return to the country. Meanwhile, the Chinese government has initiated a number of policies to attract international highly-skilled talents and enhance the country's competitiveness, and some Chinese policies have started attracting foreign talents, who are coming to the country to work, and even to stay. Since Chinese policies, mechanisms, and administration efforts to attract and retain skilled domestic or overseas talents are helping to reshape China's economy and are significantly affecting the cooperation on migration and talent mobility, these aspects, in addition to being of scholarly and research interest, hold considerable commercial potential.

Media Law and Policy in the Internet Age Doreen Weisenhaus 2017-02-23 The Internet brings opportunity and peril for media freedom and freedom of expression. It enables new forms of publication and extends the reach of traditional publishers, but its power increases the potential damage of harmful speech and invites state regulation and censorship as well as manipulation by private and commercial interests. In jurisdictions around the world, courts, lawmakers and regulators grapple with these contradictions and challenges in different ways with different goals in mind. The media law reforms they

are adopting or considering contain crucial lessons for those forming their own responses or who seek to understand how technology is driving such rapid change in how information and opinion are distributed or restricted. In this book, many of the world's leading authorities examine the emerging landscape of reform in nations with variable political and legal contexts. They analyse developments particularly through the prisms of defamation and media regulation, but also explore the impact of technology on privacy law and national security. Whether as jurists, lawmakers, legal practitioners or scholars, they are at the front lines of a story of epic change in how and why the Internet is changing the nature and raising the stakes of 21st century communication and expression.
