Evaluation for Continuing Education Alan B. Knox 2002-10-02 *Evaluation for Continuing Education* provides the useful and practical tools necessary to ensure a successful program evaluation. The book presents systematic guidelines aimed at enhancing understanding of evaluation concepts and procedures, and offers manageable ways to selectively include evaluation activities as an integral part of program planning, implementation, and justification. Author Alan Knox reveals that the key to successful evaluations that improve education programs for adults is a basic rationale for why and how. He helps readers select and develop their own rationale throughout the course of the book while suggesting fundamental evaluation concepts and procedures. He shows how to distinguish some program aspect upon which a specific evaluation project will focus—including needs assessment, goals and policies, staffing assessment, materials development, and more—and summarizes examples of evaluation reports that reflect the various types of providers and scales on which evaluations are conducted. Knox offers a particularly wide variety of these examples, enabling readers to reflect on implications for their own evaluations and fashion unique guidelines and procedures that fit their own situations.

Motivational Immediacy Jonathan E. Taylor 2021-12-29 This book provides a fresh look at the question of learner motivation and engagement, beginning with an investigation of potential motivations not to learn, the better to help instructors find more successful ways to engage learners in any given situation. After examining various kinds of resistance to learning,

the book goes on to describe effective ways of overcoming resistance and engaging learners. Grounded in the literature of many fields, such as Adult Education, Psychology, Sociology, Cultural Anthropology, and Communication (as well as the author's own decades of experience), the book connects the concepts surrounding learning resistance directly to engagement and human motivation, drawing these ideas together to make the case for practicing motivational immediacy in all learning spaces. The second section of the book focuses on the various tools effective teachers might use to mitigate learner resistance and foster authentic and lasting engagement. The author devotes a chapter to using curriculum and Instructional Systems Design (ISD) processes to effectively foster engaged learning in different learning spaces and contexts. Two chapters are devoted to applying the theory and methods to specific domains: online learning environments, and face-to-face classrooms with both undergraduate and graduate students. The last section includes a chapter that provides a potential method to measure effectual learning in the classroom, and one that addresses the ethical issues sometimes said to exist in efforts to mitigate learner resistance and foster engagement in its place. The final chapter draws the book to a close by presenting a fluid whole that will greatly improve understanding of the ideas as well as the methods best used to reduce learning resistance, increase learner engagement, and facilitate motivational immediacy and effectual learning.
