The Kite Runner Khaled Hosseini 2017-03-01 I became what I am today at the age of twelve. I remember the precise moment, crouching behind a mud wall on a frigid winter day in 1975 . . . looking into a deserted alley. It's wrong what they say about the past, about how you can bury it, because the past claws its way out. I realize I've been looking into that alley for the last 26 years. Afghanistan is a divided country on the verge of war and two childhood friends are about to be torn apart. It's a beautiful afternoon in Kabul and the skies are full of the excitement and joy of a kite flying tournament. But neither Hassan or Amir can foresee the terrible incident which will shatter their lives forever. Khaled Hosseini's first and international best-selling novel has now been adapted into a stunning stage adaptation by Matthew Spangler. This edition was published for the production at Wyndham's Theatre, London, from 21 December 2016.

Taste and Smell Dietmar Krautwurst 2016-12-29 Medicinal chemistry is both science and art. The science of medicinal chemistry offers mankind one of its best hopes for improving the quality of life. The art of medicinal chemistry continues to challenge its practitioners with the need for both intuition and experience to discover new drugs. Hence sharing the experience of drug research is uniquely beneficial to the field of medicinal chemistry. Drug research requires interdisciplinary team-work at the interface between chemistry, biology and medicine. Therefore, the topic-related series Topics in Medicinal Chemistry covers all relevant aspects of drug research, e.g. pathobiochemistry of diseases, identification and validation of (emerging) drug targets, structural biology, drugability of targets, drug design approaches, chemogenomics, synthetic chemistry including combinatorial methods, bioorganic chemistry, natural compounds, high-throughput screening, pharmacological in vitro and in vivo investigations, drug-receptor interactions on the molecular level, structure-activity relationships, drug absorption, distribution, metabolism, elimination, toxicology and pharmacogenomics. In general, special volumes are edited by well known guest editors.
