Visual Aircraft Recognition U. S. Army 2013-01-14 This manual is primarily a ready reference to

assist the ground observer in aircraft recognition and identification. It provides information on current operational aircraft of the United States and foreign countries, which may be observed worldwide in the combat area. It can be used as source material for personnel conducting unit training in visual aircraft recognition. The procedures in this publication apply throughout the US Army. The data is based on the best information available at the time of publication; however, it is not all-inclusive because of some classification guidelines. This publication, by nature, has a built-in time lag, and some aircraft may still be under development or classified at the time of writing, but may be fielded or unclassified at, or after, publication.

Social Marketing in Action Debra Z. Basil 2019-05-24 This textbook provides students with real-world social marketing case studies from different countries and regions around the world, taking learners from classroom theory to practice. The primary objective is to clearly portray to students distinct, identifiable steps that are essential for successful social marketing campaigns. Core social marketing practices are applied to each case to help students master social marketing principles and apply them to their own real world social marketing activities in order to affect positive social change. This textbook first provides the tools necessary to understand the effective application of social marketing, and then offers 24 case studies exemplifying effective social marketing efforts from all around the world. Specifically, Part I clearly and concisely explains the principles of social marketing in five chapters: • Upstream vs. downstream social marketing, SWOT, competition • Fundamentals of social marketing, ethics • Formative and Evaluative Research • Theories applied in social marketing • A historical perspective on social marketing Part II features 24 social marketing case studies that demonstrate the application of social marketing principles. All 24 cases follow a consistent structure that includes: • Background • Positioning • SWOT • Research • Objectives • The 4 P's • Target audience • Evaluation • Barriers and benefits • Discussion • Competition This format allows for students and professors to easily and effectively select individual cases and compare between cases. This textbook also allows instructors to encourage critical thinking by having students compare and contrast not only the cases themselves, but the applications used. In addition, teaching guides with answers to discussion questions, suggestions for activities inside and outside of the classroom and further readings are available to assist professors in teaching from this book.

Above the Law Adrian Bleese 2021-07-19 Adventures in a helicopter Adrian Bleese spent twelve years flying on police helicopters, and attended almost 3,000 incidents, as one of only a handful of civilian air observers working anywhere in the world. In Above The Law he recounts the most intriguing, challenging, amusing and downright baffling episodes in his career working for Suffolk Constabulary and the National Police Air Service. Rescuing lost walkers, chasing cars down narrow country lanes, searching for a rural cannabis factory and disrupting an illegal forest rave...they're all in a day's work. It's a side of policing that most of us never see, and he describes it with real compassion as he lives his dream job, indulging his love of flying, the English landscape and helping people. Perhaps more than anything, it's a story about hope.
