Daring Young Men Richard Reeves 2010-04-03 In the early hours of June 26, 1948, phones began ringing across America, waking up the airmen of World War II—pilots, navigators, and mechanics—who were finally beginning normal lives with new houses, new jobs, new wives, and new babies. Some were given just forty-eight hours to report to local military bases. The president, Harry S. Truman, was recalling them to active duty to try to save the desperate people of the western sectors of Berlin, the enemy capital many of them had bombed to rubble only three years before. Soviet dictator Joseph Stalin had ordered a blockade of the city, isolating the people of West Berlin, using hundreds of thousands of Red Army soldiers to close off all land and water access to the city. He was gambling that he could drive out the small detachments of American, British, and French occupation troops, because their only option was to stay and watch Berliners starve—or retaliate by starting World War III. The situation was impossible, Truman was told by his national security advisers, including the Joint Chiefs of Staff. His answer: "We stay in Berlin. Period." That was when the phones started ringing and local police began banging on doors to deliver telegrams to the vets. Drawing on service records and hundreds of interviews in the United States, Germany, and Great Britain, Reeves tells the stories of these civilian airmen, the successors to Stephen Ambrose's "Citizen Soldiers," ordinary Americans again called to extraordinary tasks. They did the impossible, living in barns and muddy tents, flying over Soviet-occupied territory day and night, trying to stay awake, making it up as they went along and ignoring Russian fighters and occasional anti-aircraft fire trying to drive them to hostile ground. The Berlin Airlift changed the world. It ended when Stalin backed down and lifted the blockade, but only after the bravery and sense of duty of those

young heroes had bought the Allies enough time to create a new West Germany and sign the mutual defense agreement that created NATO, the North Atlantic Treaty Organization. And then they went home again. Some of them forgot where they had parked their cars after they got the call.

Ming Tea Murder Laura Childs 2015-05-05 It's scones and scandal for Indigo Tea Shop owner Theodosia Browning in the latest from the New York Times bestselling author of *Steeped in Evil*... Normally Theodosia wouldn't attend a black tie affair for all the tea in China. But she can hardly say no to her hunky, handsome boyfriend, Max, who directs public relations for the Gibbes Museum in Charleston. Max has organized an amazing gala opening for an exhibit of a genuine eighteenth century Chinese teahouse, and the *crème de la crème* of Charleston society is invited. In the exotic garden staged in the museum's rotunda, a Chinese dragon dances to the beat of drums as it weaves through the crowd. The guests are serenaded by a Chinese violin as they sample an assortment of tempting bites. And to give them a memento of the occasion, there's even a photo booth. But Theodosia makes a grim discovery behind the booth's curtains: the body of museum donor Edgar Webster. While Theodosia prefers tea service over the service of justice, this case is difficult to ignore—especially after Max becomes a suspect. Now she must examine the life of the fallen philanthropist and find out who really wanted him to pay up...

Formation and Intertextuality in Isaiah 24–27 J. Todd Hibbard 2013-10-30 Isaiah 24–27, the so-called Isaiah Apocalypse, is often regarded as one of the latest sections added to the book of Isaiah. The formation and interpretation of these chapters are widely recognized as important matters for understanding the compositional history of Isaiah, emerging religious thought in the Persian period, and scribal techniques for late biblical materials. The essays in this volume explore these and other important issues of Isaiah 24–27 in light of the abundant recent research on these chapters. In addition, this volume outlines new directions forward for research on these pivotal chapters and their place in Isaiah and the prophetic literature generally. The contributors are Micaël Bürki, Paul Kang-Kul Cho, Stephen L. Cook, Wilson de A. Cunha, Carol J. Dempsey, Janling Fu, Christopher B. Hays, J. Todd Hibbard, Hyun Chul Paul Kim, Beth Steiner, John T. Willis, Archibald L. H. M. van Wieringen, and Annemarieke van

der Woude.

The Book of L G. Rozenberg 2012-12-06 This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

Komodo Dragons James B. Murphy 2015-03-31 More than twenty years have passed since Walter Auffenberg's monumental *The Behavioral Ecology of the Komodo Monitor*. In the intervening years the populations of Komodo dragons—native only to a handful of islands in southeast Indonesia—have dwindled, sparking intensive conservation efforts. During the last two decades new information about these formidable predators has emerged, and the most important findings are clearly presented here. A memoir from Walter Auffenberg and his son Kurt is followed by the latest information on Komodo dragon biology, ecology, population distribution, and behavior. The second part of the book is dedicated to step-by-step management and conservation techniques, both for wild and captive dragons. This successful model is a useful template for the conservation of other endangered species as well, for, as Kurt and Walter Auffenberg note, "The species may well indeed survive in the wild for generations to come while countless other organisms are lost."

The Ferguson Tractor Story Stuart Gibbard 2019-11 The little grey Fergie is Britain's best-loved tractor, the light user-friendly machine that finally replaced the horse on farms. This highly illustrated account covers the full history of Harry Ferguson's tractor products from his pioneering work before the 1930s to the merger with Massey in 1957. The author has had access to fresh archive material and has interviewed many of the surviving men who were associated with Ferguson. The appeal of the Fergie lay in its lightness and utility, and also in the system of mechanized farming of which it was a part. Throughout the book, reference is made to the implements which lay at the heart of the system. Stuart Gibbard has won "Tractor and Machinery" magazine's award for the best British tractor book five years running.

Gordon Keith Thomas Nelson Page 1903 1903. Thomas Nelson Page, author of short stories, novels, essays, and poetry, is best known for his role as literary spokesman for the glories of the Old South. Gordon Keith begins: Gordon Keith

was the son of a gentleman. And this fact, like the cat the honest miller left to his youngest son, was his only patrimony. As in that case also, it stood to the possessor in the place of a good many other things. It helped him over many rough places. He carried it with him as a devoted Romanist wears a sacred scapular next to the heart. See other titles by this author available from Kessinger Publishing.

A Disney Sketchbook Ken Shue 2012-10-09 Imagine if one sketchbook had been passed down through the decades from one Disney animator to the next, with each one making a contribution before leaving it in the talented hands of another artist. That idea was the inspiration for A Disney Sketchbook. The drawings contained within it represent the entire range of animation development, from the origins of ideas to fully conceived characters. Pencil studies of a much-younger Wendy and a serpentlike sea witch reveal the many imaginative iterations that animators create before they ultimately perfect every hero and villain. And comprehensive studies of Mickey and Baloo showcase the dedication that goes into defining the facial expressions and body language of each beloved character. Films and shorts from throughout the history of the company are featured—beginning with Steamboat Willie and ending with Tangled—demonstrating the ingenuity and skill that have remained a constant at Walt Disney Animation Studios since 1928.

Greater Cincinnati Religious Peacemakers Various Religious Leaders from Greater Cincinnati 2021-09 Throughout human history, wars and violence have often been waged in the name of religions and in the name of diverging religious beliefs and belonging. Ironically, though, all religions in their teachings speak of nonviolence and have in common the promotion of peace and justice, namely the respect of human life and dignity, the institution of human rights, the protection of the poor and vulnerable, the freeing of the oppressed, the active elimination of injustice? It seems therefore, that violence and wars would be antithetical to religions; yet they are so frequently used as their justification. Are we then speaking of different "religions"? "Institutional religions," the ones structured by humans and that are brandished to lead violence and wars, become in fact quite foreign to the essence of the religions as they were established by their founders and that they intend to represent; they actually contribute to their destruction. Wanting to reflect on that point, I embarked, a few years ago, on giving voice to local religious individuals, whom I called "Religious Peacemakers," and who, each by living the essential teachings of their particular faith, contributed by their actions to peace and justice. I wanted to prove that their path, irrespective of their original religion, would be similar, and that their diverse faith, instead of separating them, would on the contrary end up uniting them.

Learning with Information Systems Simon Bell 2013-02-01 In Learning with Information Systems the author takes the developing world as the context and through a series of case studies develops a commonly used systems analysis methodology. He demonstrates how this methodology can evolve and adapt as new ideas become prominent. Issues of sustainability of information systems, participation in systems design and user ownership of systems are all examined. This book does not attempt to be prescriptive for all contexts nor does it focus on any particular technology. It addresses the essential questions and promises practical approaches which will help in the avoidance of the worst forms of disaster associated with the planning of information systems for developing countries.

Tractors Nick Baldwin 2011-11-20 Steam, and then cumbersome motor, tractors existed in small numbers before 1914, after which the need to produce more foods using less horse and man power saw the origins of the machine we know today. Thanks to mass production, Ford brought the price down to suit average farmers, and in the 1920s to 1940s numerous rivals brought in such novelties as diesel engines, pneumatic tyres, hydraulic implement lifts and even cost-effective all-wheel drive and weather protection. After the Second World-War, a strong new indigenous tractor industry was led by Ferguson, David Brown, Nuffield and Ford. This book highlights these developments and goes on to show the dramatic improvements of the 1950s and 1960s.
