Pediatric Skills for Occupational Therapy Assistants E-Book Jean W. Solomon 2020-07-12 Learn to provide effective therapy for children and adolescents! Pediatric Skills for Occupational Therapy Assistants, 5th Edition covers the entire scope of pediatric OT practice, from normal childhood development to pediatric disorders and treatment planning. Case studies and helpful tips reinforce your understanding and make it easier to apply OT principles to the clinical setting. This edition is thoroughly updated with online videos and new coverage of community systems, physical agent modalities, childhood obesity, Model of Human Occupation assessments, and Kinesio Taping®. Written by noted OTA educators Jean Solomon and Jane O'Brien, this resource is both a comprehensive textbook and a practical clinical reference! Hundreds of case examples provide snapshots of real-life situations and solutions, helping you apply key concepts in a real-life setting. UNIQUE! Clinical Pearls boxes highlight practical advice from the authors and contributors, sharing what they have learned from years of experience. Coverage of evidence-based practice includes clinical trials and outcome studies, especially those relating to evaluation and intervention. Coverage of cultural diversity and sensitivity issues addresses the many different groups of people that OTAs treat in practice. Information on preventive care takes the role of the OTA beyond intervention and treatment. Family-centered perspective uses the terminology of the AOTA Practice Framework in showing how to tailor your treatment to meet the needs of children from different environments. Key terms, outlines, and objectives at the beginning of each chapter prepare readers for the information they're expected to learn from the chapter. Content reviews and questions at the end of each chapter summarize key concepts and help you assess your understanding. Suggested activities in each chapter help readers to bridge the gap between the classroom and the clinic by exploring realistic situations. UNIQUE! Learning resources on the Evolve companion website include video clips and review questions, reinforcing your understanding and demonstrating how concepts apply to actual practice. NEW! Every Moment Counts content is added to The Occupational Therapy Process chapter, promoting pediatric mental health. NEW! Coverage of educational expectations is added to the Educational System chapter. NEW! Coverage of "signature" constraint-induced movement therapy (CIMT) is added to Cerebral Palsy chapter. NEW photographs and illustrations are added throughout the book. NEW video clips on the Evolve companion website show the typical development of children/adolescents. NEW! Extensive assessment and abbreviations appendices are added to Evolve. NEW! Expanded glossary is added to Evolve.

MVPT-V 1997 Designed for screening, diagnostic, and research purposes, to assess visual perception while avoiding any motor involvement that would influence the assessment. For use with children and adults.

Visual Perception in School-aged Children Rachel Wood Christian 2010 Visual perceptual skills are often assessed using paper-and-pencil tests such as the Motor-Free Visual Perception Test, 3rd Edition (MVPT-3). A computer-based version of this assessment was independently developed. This study aimed to establish its reliability by comparing scores of 3rd grade children at a local private school on each of the two testing mediums using a test-retest method. A strong correlation of age adjusted raw scores on the two testing mediums were anticipated, which would indicate that the computer-based version of the MVPT-3 is as reliable as the paper-based version. The current study found inconclusive results after correlational analysis, but results showed that 72.5% of participants received clinically comparable results. Clinically comparable results indicate that within the practical settings which this assessment may be utilized, the practitioner administering the assessment would offer similar recommendations. Regarding participants who did not receive clinically comparable results, assessment medium order is associated with incomparable scores. These results support the C-MVPT-III as a reliable and valid tool.

Orthopedic Care of Patients with Cerebral Palsy Philip D. Nowicki 2020-06-22 Many of the existing books focusing on the orthopedic management of patients with cerebral palsy encompass only care for the young patient, but this practical text reviews and delineates orthopedic care for patients with cerebral palsy throughout the lifespan. Readers will find a discussion of both non-operative and operative orthopedic management across all ages and functional levels. The text presents a general overview of cerebral palsy, evaluation of patients with cerebral palsy, and procedures commonly used to treat various orthopedic conditions in patients with cerebral palsy. Spasticity management and gait evaluation are likewise highlighted, and surgical chapters cover techniques for the hip, knee, foot and ankle, and spine. It also incorporates chapters focused on issues related to the rehabilitation of patients with cerebral palsy, including bracing, orthotics and other durable medical equipment, physical and occupational therapy, pain management, and adaptive activities and sports, which aim to improve the overall quality of life for patients through the lifespan. Finally, there is a chapter focused on the care transition from childhood to adulthood, an area of importance often neglected in current texts covering patients with cerebral palsy. Whether in the operating room, multi-specialty clinic or private office, Orthopedic Care of Patients with Cerebral Palsy will be a go-to resource for orthopedists, pediatricians and all medical professionals caring for this population.

Handbook for the Assessment of Driving Capacity Maria T. Schultheis 2011-05-05 This is a resource for professionals involved in determining the driving capacity of individuals with neurological involvement and or trauma. While much work has been completed in this new and growing field, this is the first attempt to bring together clinical work on assessing driving capacity for different clinical populations and conditions. Specific topics include, traumatic brain injury, stroke, dementia, normal aging, medications, retraining, interventions, medical conditions, legal issues, practical issues, assessment instruments, simulators, research and epidemiology. Each chapter will address clinically relevant issues specific to the clinical population. This comprehensive compilation of driving assessment of cognitively compromised populations is the first of its kind and Dr. Schultheis is regarded as a leader in the field. \*The first definitive handbook about driving assessment of cognitively impaired populations, a growing area of research \*Addresses a myriad of clinical populations and conditions such as brain injured and elderly patients \*Written by nationally recognized leaders in their fields of expertise

Cognitive and Perceptual Rehabilitation Glen Gillen 2008-04-29 Reflecting current practice with a renewed focus on function-based assessments and evidence-based interventions, Cognitive and Perceptual Rehabilitation: Optimizing Function includes all of the tools you need to make a positive impact on your patients' lives. This clinical resource summarizes, highlights, and constructively critiques the state of cognitive and perceptual rehabilitation. This text helps you enhance your patients' quality of life by promoting improved performance of necessary and meaningful activities, and decreasing participation restrictions. Evidence-based intervention tables focus on improving daily function through proven methods. Summary tables highlight each assessment's clinical utility and psychometric properties to provide you with the tools you need to choose the best assessment for each patient. An entire chapter on Application of Concepts features five case studies, each discussing background data and medical record review, evaluation findings, assessments, long-term goals, short-term goals, and interventions/functional activities to help you apply the theories and principles from the book to real-world situations. Handy learning aids including Key Terms, Learning Objectives, and Review Questions help you remember important information.

*Essentials of Neuropsychological Assessment* Nancy Hebben 2009-09-10 Quickly acquire the knowledge and skills you need to confidently administer, score, and interpret the most popular neuropsychological assessment instruments Neuropsychological testing can identify changes in cognition, behavior, and emotion; aid in determining the cause of a disorder or developmental problem; and assist clinicians in planning treatment and rehabilitation. To use these tests properly, professionals need an authoritative source of advice and guidance on how to administer, score, and interpret them. Now fully revised and in a second edition, *Essentials of Neuropsychological Assessment* is that source. Completely updated to include the most current instruments, including the Delis-Kaplan Executive Function System (D-KEFS), the Wechsler Intelligence Scale for Children-Fourth Edition (WISC-IV), the Wechsler Adult Intelligence Scale-Fourth Edition (WAIS-IV), and the Wechsler Memory Scale-Fourth Edition (WMS-IV), *Essentials of Neuropsychological Assessment, Second Edition* presents an overview of the assumptions, logic, knowledge base, and skills underlying the practice of neuropsychological assessment. Neuropsychological experts Nancy Hebben and William Milberg

describe how clinical history, behavioral observations, and formal test results are used to make inferences about the contribution of brain dysfunction to psychological functioning. Like all the volumes in the Essentials of Psychological Assessment series, this book is designed to help busy mental health professionals quickly acquire the knowledge and skills they need to make optimal use of major neuropsychological assessment instruments. Each concise chapter features numerous callout boxes highlighting key concepts, bulleted points, and extensive illustrative material, as well as test questions that help you gauge and reinforce your grasp of the information covered. Essentials of Neuropsychological Assessment, Second Edition provides comprehensive instruction on neuropsychological test administration, scoring, interpretation, and report writing. It also addresses practical and conceptual issues related to neuropsychological assessment in geriatric, pediatric, forensic, and other specialized settings. Civil Capacities in Clinical Neuropsychology George J. Demakis 2012-10-15 Clinical neuropsychologists are increasingly involved in the evaluation of civil capacities and are in demand by other professionals, particularly attorneys and judges, to assist their decision-making about these sometimes complex issues. While there has been some neuropsychological research in this area, this has not been assembled into a single volume nor have practice recommendations been provided. This volume fills these gaps. The first part of this volume reviews and synthesizes the research literature on neuropsychological aspects of civil capacities. The specific capacities addressed include driving, financial and healthcare decision-making, testamentary (i.e., will-making) capacity, and personal care and independence. Each chapter addresses relevant background issues, conceptual/theoretical advances, and empirical findings. The chapters also include an illustrative case study that demonstrates how the authors (each expert in the various areas) evaluated and conceptualized the case. Each chapter is written from an evidence-based perspective and, where appropriate, uses research to inform practice recommendations. The second part of this volume provides recommendations to practitioners on how to conduct civil capacity evaluations that utilize neuropsychological assessment. There are chapters on an evaluative framework for the assessment, capacity test selection and psychometric issues, working with other data sources besides testing (e.g., collateral interviews), best practices in report-writing and testifying, as well as common ethical issues in such cases. Throughout, these chapters provide practical "how to" advice to improve neuropsychological practice and consulting in civil capacity cases. In addition to these chapters, there is a chapter written by legal consumers of psychological reports. This chapter offers a wealth of useful information and recommendations that, if followed, will further serve to advance psychological report-writing and consultation in civil capacity evaluations.

Encyclopedia of Special Education Cecil R. Reynolds 2007-02-26 The Third Edition of the highly acclaimed Encyclopedia of Special Education has been thoroughly updated to include the latest information about new legislation and guidelines. In addition, this comprehensive resource features school psychology, neuropsychology, reviews of new tests and curricula that have been developed since publication of the second edition in 1999, and new biographies of important figures in special education. Handbook of Nonverbal Assessment R. Steve McCallum 2017-02-21 The second edition of this comprehensive volume presents methods for nonverbal assessment of diverse individuals, such as persons with speech or hearing deficits, limited English skills, or emotional problems. Chapters provide a contemporary context for nonverbal evaluations, accompanied by descriptions of best practices in detecting bias in cognitive tests, multicultural assessment, cross-battery assessment of nonverbal cognitive ability, and psychological and physiological influences on assessment. The book discusses nonverbal assessment of cognition and intelligence as well as related domains, such as academic skills, neurocognitive functioning, personality, and behavior issues. Guidelines for using common nonverbal assessment tools and strategies feature the most up-to-date information on administration and scoring, psychometric properties, and strengths and limitations. Best practices for testing diverse children and adults and using reliable, valid, and fair assessment instruments are emphasized throughout the book. Featured instruments in the Handbook include: The Universal Nonverbal Intelligence Test, Second Edition (UNIT2). The newest version of the Leiter International Performance Scale (Leiter-3). The Wechsler Nonverbal Scale of Ability (WNV). The Comprehensive Test of Nonverbal Intelligence, Second Edition (CTONI-2). The Test of Nonverbal Intelligence. The General Ability Measure for Adults (GAMA). The Second Edition of the Handbook of Nonverbal Assessment is a must-have resource for researchers and graduate students in school and clinical child psychology, speech and language pathology, educational technology, social work, and related disciplines as well as clinicians, professionals, and in-service educators of diverse students.

Nonverbal Learning Disabilities Cesare Cornoldi 2016-09-13 Increasing numbers of children and adolescents are being diagnosed with nonverbal learning disabilities (NLD), yet clinicians and educators have few scientific resources to guide assessment and intervention. This book presents up-to-date knowledge on the nature of NLD and how to differentiate it from DSM-5 disorders such as autism spectrum disorder and developmental coordination disorder. Effective strategies for helping K-12 students and their families address the challenges of NLD in and outside of the classroom are illustrated with vivid case material. The authors thoughtfully consider controversies surrounding NLD, discuss why the diagnosis is not included in the current DSM and ICD classification systems, and identify important directions for future research.

**Handbook of Assessment in Clinical Gerontology** Peter A. Lichtenberg 2010-08-20 New trends in mental healthcare practice and a rapid increase in the aged population are causing an explosion in the fields of clinical gerontology and geropsychology today. This comprehensive second edition handbook offers clinicians and graduate students clear guidelines and reliable tools for assessing general mental health, cognitive functioning, functional age, psychosocial health, comorbidity, behavior deficits, and more. Psychopathology, behavioral disorders, changes in cognition, and changes in everyday functioning are addressed in full, and a wide range of conditions and disorders common to this patient population are covered. Each chapter provides an empirical review of assessment instruments, assessment scales in their totality, a review of how these instruments are used with and adapted for different cultural groups, illustration of assessments through case studies, and information on how to utilize ongoing assessment in treatment and/or treatment planning. This combination of elements will make the volume the definitive assessment source for clinicians working with elderly patients. The most comprehensive source of up-to-date data on gerontological assessment, with review articles covering: psychopathology, behavioral disorders, changes in cognition, and changes in everyday functioning Consolidates broadly distributed literature into single source, saving researchers and clinicians time in obtaining and translating information and improving the level of further research and care they can provide Chapters directly address the range of conditions and disorders most common for this patient population - i.e. driving ability, mental competency, sleep, nutrition, sexual functioning, demntias, elder abuse, depression, anxiety disorders, etc Fully informs readers regarding conditions most commonly encountered in real world treatment of an elderly patient population Each chapter cites case studies to illustrate assessment techniques Exposes reader to real-world application of each assessment discussed

**Evidence-Based Practice in Infant and Early Childhood Psychology** Barbara A. Mowder 2009-07-17 An authoritative guide to evidence-based treatment of infants and young children

**Evidence-Based Practice in Infant and Early Childhood Psychology** is the first handbook of its kind to consider the complete psychological needs of infants and young children, from birth to early childhood. With a focus on evidence-based practice, the book provides a balanced perspective of diverse and ethical practice with research and educational recommendations interwoven throughout. Comprehensive in scope, **Evidence-Based Practice in Infant and Early Childhood Psychology** is divided into four sections: Foundations provides the framework for considering psychological and educational service provisions for young children and their families Assessment and Intervention includes chapters on assessing infants, toddlers, preschoolers, parents and families, and bilingual and multicultural children Evidence-Based Practice addresses evidence-based treatments for particular issues such as autism, ADHD, health impairments, and more Contemporary Issues examines current perspectives on issues such as childcare, neuropsychology, Response to Intervention (RTI) and violence prevention **Preparing for the Occupational Therapy National Board Exam: 45 Days and Counting** Rosanne DiZazzo-Miller 2016-10-14 **Preparing for the Occupational Therapy National Board Exam: 45 Days and Counting, Second Edition** is a comprehensive overview for occupational therapist students preparing to take the National Board for Certification in Occupational Therapy (NBCOT) OTR exam. It utilizes a well-received health and wellness focus and includes tips and self-assessment forms to develop effective study habits. **Temporal Stability of the Electronic Version of the Motor-Free Visual Perception Test Third Edition (MVPT-3)** Andrea Sparks Eanes 2014 In today's technology based society, children are learning information from digital devices and are currently being tested by paper assessments. New electronic assessments have been created to try to compensate for this discrepancy. However, very few of these electronic assessments have been tested to see if they are a reliable measure. The electronic version of the Motor-Free Visual Perception Test 3rd edition (MVPT-3) is a recently developed assessment that has not been assessed to see if it is a reliable measure. The purpose of this study sought to determine if the electronic version of the MVPT-3 is reliable assessment to use with children ages 4 years 0 months to 10 years 11 months. A test-retest correlational design was used to assess temporal stability. The main research questions reviewed if multiple administrations of the Electronic Version of the MVPT-3 yields consistent outcome scores and if the electronic version of the MVPT-3 is reliable for professionals to use clinically. Fifty-four participants were recruited from four daycare centers and afterschool programs in Eastern and Central North Carolina and ranged in ages 4 years 0 months to 10 years 11 months. Complete data was collected on forty-eight participants and was analyzed via a single tailed Pearson product-moment correlation. The results indicated that the electronic version of the MVPT-3 presents clinically acceptable test-retest reliability with a correlation coefficient of  $r=.81$ . Learning effects were revealed for certain items. Results indicate that this is an appropriate screening assessment for school aged children but should not be used for diagnostic purposes. The results also demonstrate that further and more

extensive research needs to be conducted in order to determine if the electronic version of the MVPT-3 is a reliable measure of visual perception.
