**Suicide Protest in South Asia** Simanti Lahiri 2014-04-03 The radical act of suicide protest is undertaken by social movement participants in order to demand a particular previously articulated political outcome. This book examines the history and impact of suicide protest, which has been increasingly used as a protest tactic since World War II, adding to a growing area of research on the ability of certain actions to impact policy in favour of movement goals. The book offers a combination of historical and contemporary cases analysis from South Asia, where different iterations of this tactic have been used extensively throughout the latter half of the twentieth century, including the use of fasting to the death, self-immolation, and deliberate drowning. Focussing on the success or failure of a particular action relevant to the movement's broader mobilization strategy, the author examines the internal impact this has on the movement and the mechanisms by which suicide as a form of protest evolves. Providing a unique contribution to the field of comparative politics, political violence and social movement studies this book will be of interest to scholars working on political science, sociology and South Asian studies.

**Mastering Space** John Agnew 2002-09-26 For over two hundred years the domination of some countries by others has been intrinsic to international relations, with national economic and political strength viewed as essential to a nation's survival and global position. Mastering Space identifies the essential features of this "state-centredness" and suggests an optimistic alternative more in keeping with the contemporary post-Cold War climate. Drawing on recent geopolitical thinking, the authors claim that the dynamism of the international political economy has been obscured through excessive attention on the state as an unchanging actor. Dealing with such topical issues as Japan's rise to economic dominance and America's perceived decline, as well as the global impact of continued geographical change, the book discusses the role of geographical organization in the global political economy, and the impact of increasing economic globalisation and political fragmentation in future international relations. The authors identify the present time as crucial to the global political economy, and explore the possibilities of moving the world from mastering space to real reciprocity between peoples and places. John Agnew is a Professor of Geography at the Maxwell School of Citizenship and Public Affairs, Syracuse University. Stuart Corbridge is a lecturer in Geography at the University of Cambridge and a Fellow of Sidney Sussex College.

**Islamic Politics, Muslim States, and Counterterrorism Tensions** Peter Henne 2017-03-02 The US Global War on Terror and earlier US counterterrorism efforts prompted a variety of responses from Muslim states despite widespread Islamic opposition. Some cooperated extensively, some balked at US policy priorities, and others vacillated between these extremes. This book explains how differing religion-state relationships, regimes' political calculations, and Islamic politics combined to produce patterns of tensions and cooperation between the United States and Muslim states over counterterrorism, using rigorous quantitative analysis and case studies of Pakistan, the United Arab Emirates, and Turkey. The book combines recent advances in the study of political institutions with work on religion and politics to advance a novel theory of religion and international relations that will be of value to anyone studying religion, terrorism, or Islamic politics. It also provides numerous insights into current events in the Middle East by extending its analysis to the Arab Spring and the rise of the Islamic State.

**Sufism and Saint Veneration in Contemporary Bangladesh** Hans Harder 2011-03-08 Focusing on the Maijbandari movement in Chittagong, south-eastern Bangladesh, which claims the status of the only Sufi order originated in Bengal and which has gained immense popularity in recent years, this book provides a comprehensive picture of an important aspect of contemporary Bengali Islam in the South Asian context.

**The Politics of Evidence (Open Access)** Justin Parkhurst 2016-10-04 The Open Access version of this book, available at <http://www.tandfebooks.com/>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 3.0 license. There has been an enormous increase in interest in the use of evidence for

public policymaking, but the vast majority of work on the subject has failed to engage with the political nature of decision making and how this influences the ways in which evidence will be used (or misused) within political areas. This book provides new insights into the nature of political bias with regards to evidence and critically considers what an 'improved' use of evidence would look like from a policymaking perspective. Part I describes the great potential for evidence to help achieve social goals, as well as the challenges raised by the political nature of policymaking. It explores the concern of evidence advocates that political interests drive the misuse or manipulation of evidence, as well as counter-concerns of critical policy scholars about how appeals to 'evidence-based policy' can depoliticise political debates. Both concerns reflect forms of bias – the first representing technical bias, whereby evidence use violates principles of scientific best practice, and the second representing issue bias in how appeals to evidence can shift political debates to particular questions or marginalise policy-relevant social concerns. Part II then draws on the fields of policy studies and cognitive psychology to understand the origins and mechanisms of both forms of bias in relation to political interests and values. It illustrates how such biases are not only common, but can be much more predictable once we recognise their origins and manifestations in policy arenas. Finally, Part III discusses ways to move forward for those seeking to improve the use of evidence in public policymaking. It explores what constitutes 'good evidence for policy', as well as the 'good use of evidence' within policy processes, and considers how to build evidence-advisory institutions that embed key principles of both scientific good practice and democratic representation. Taken as a whole, the approach promoted is termed the 'good governance of evidence' – a concept that represents the use of rigorous, systematic and technically valid pieces of evidence within decision-making processes that are representative of, and accountable to, populations served.

Muslims and Capitalism Béatrice Hendrich 2018-12-18 From today's perspective, Islam and capitalism seem to be natural partners. In a world where state socialism is on the wane, Islamic states in particular seem to be run by an exploitative class that in their hyper-capitalist way of profit-making does not care at all about social justice. Modern history, however, has seen a great number of movements, political parties and individuals propagating the incompatibility of capitalism with Islam. And at a second glance, the quest for social justice and the rejection of capitalism actually appear as a driving force in different Islamic discourses, including that of the so-called Islamic State. The articles of this volume offer intriguing and original thoughts about the appropriate economic system for a Muslim society. Some of the concepts are based right away on socialism, while others call for a genuine, non-Western Islamic 'third way' between communism and capitalism. In fact, political reality has forced the secular Left to grapple with the response of Islamic movements to poverty and injustice. The volume therefore also includes useful insights into the Left's reaction to this political challenge. The articles cover a wide range of world regions, not only the Middle East and Turkey, but also the Far East and North Africa, with a time span ranging from the late 19th century to the present. In addition, the reader is also introduced to economic concepts of early Islam and their textual sources.

Globalisation and Governance in India Harihar Bhattacharyya 2015-07-24 This book examines the impact of globalization on some vital aspects of Indian politics, its structures and processes, and identifies the challenges to globalization itself, in order to highlight India's complex and fascinating story. In 1991, India officially embraced the policy of neo-liberal reforms by signing the GATT agreement, which exposed the country, its society, culture and institutions to the various forces of globalization. Globalization as such may not be new to India, for the country has been embracing the influence of external cultures and civilisations for millennia, but the post-1991 reforms policy marked a significant shift, from a predominantly social welfare state and a command economy to a predominantly market driven one. Through a range of disciplinary perspectives, the authors analyse how India's version of secularism, communal harmony, nationhood, the public sphere, social justice, and the rights of aboriginal communities came under attack from the forces of the new dispensation. The book goes on to show how globalisation in India has posed fresh challenges to political economy, democracy, federalism, decentralization, parliamentary system, judiciary, and the parliamentary Left. Critically reflecting on themes in the context of India's globalisation that are local, regional, national and global, this book will be of interest to those in the fields of South Asian Politics, Globalisation, and International Relations.

Data Politics Didier Bigo 2019-03-13 Data has become a social and political issue because of its capacity to reconfigure relationships between states, subjects, and citizens. This book explores how data has acquired such an important capacity and examines how critical interventions in its uses in both theory and practice are possible. Data and politics are now inseparable: data is not only shaping our social relations, preferences and life chances but our very democracies. Expert international contributors consider political questions about data and the ways it provokes subjects to govern themselves by making rights claims. Concerned with the things (infrastructures of servers, devices, and cables) and language (code, programming, and algorithms) that make up cyberspace, this book demonstrates that without understanding these conditions of possibility it is impossible to intervene in or to shape data politics. Aimed at academics and postgraduate students interested in political aspects of data, this volume will also be of interest to experts in the fields of internet studies, international studies, Big Data, digital social sciences and humanities.

Post-war Dilemmas of Sri Lanka S. I. Keethaponcalan 2019-03-14 By investigating Sri Lanka as a case study, this book examines whether democracy, compared to authoritarianism, is conducive to post-war reconciliation. The

research, founded on primary as well as secondary data, concludes that political systems have little to do with the success or failure of post-war ethnic reconciliation. The Sri Lankan case indicated that post-war reconciliation is more contingent on the readiness of the former enemies to come together. Readiness stems from, for example, satisfaction in the way issues have been resolved, confidence in the other party's intentions, and the compulsion to coexist. If the level of satisfaction, confidence, and the compulsion to coexist are low, the readiness to reconcile will also be low. The end of the war had a profound impact on post-war governance and ethnic relations in Sri Lanka. Hence, the volume provides an in-depth analysis of the factors that led to the military victory of the Sri Lankan government over the Liberation Tigers of Tamil Eelam (LTTE) in 2009. The chapters delve into the nexus between governance and reconciliation under the first two post-war governments. Reconciliation did not materialize in this period. Instead, new fault-lines emerged as attacks on the Muslim community escalated drastically. This book provides a comprehensive analysis of the nature of relations between the Sinhalese and Muslims and the Tamils and Muslims, as well as the nature and causes of post-war anti-Muslim riots.

**Explaining Pakistan's Foreign Policy** Aparna Pande 2014-03-27 Pakistan has over the decades become a hotbed for the terrorist ideology often referred to as Jihadism. This book investigates the underlying principles of Pakistan's foreign policy from 1947 until the present day, and explains the rise of Jihadism as an offshoot of Pakistan's security concerns. The book goes on to discuss that from its inception as a separate state, Pakistan's foreign policy focused on seeking parity with India and escaping from an Indian South Asian identity. The desire to achieve parity with its much larger neighbour led Pakistan to seek the assistance and support of allies. The author analyses the relationship Pakistan has with Afghanistan, United States, China and the Muslim world, and looks at how these relationships are based on the desire that military, economic and diplomatic aid from these countries would bolster Pakistan's meagre resources in countering Indian economic and military strength. The book presents an interesting contribution to South Asian Studies, as well as studies on International Relations and Foreign Policy.

**Faith-Based Violence and Deobandi Militancy in Pakistan** Jawad Syed 2016-11-09 This book documents and highlights the Deobandi dimension of extremism and its implications for faith-based violence and terrorism. This dimension of radical Islam remains largely ignored or misunderstood in mainstream media and academic scholarship. The book addresses this gap. It also covers the Deobandi diaspora in the West and other countries and the role of its radical elements in transnational incidents of violence and terrorism. The specific identification of the radical Deobandi and Salafi identity of militants is useful to isolate them from the majority of peaceful Sunni and Shia Muslims. Such identification provides direction to governmental resources so they focus on those outfits, mosques, madrassas, charities, media and social media channels that are associated with these ideologies. This book comes along at a time when there is a dire need for alternative and contextual discourses on terrorism.

**Politics, Landlords and Islam in Pakistan** Nicolas Martin 2015-10-08 This book offers unique insights into the changing nature of power and hierarchy in rural Pakistan from colonial times to present day. It shows how electoral politics and the erosion of traditional patron-client ties have not empowered the lower classes. The monograph highlights the persistence of debt-bondage, and illustrates how electoral politics provides assertive landlord politicians with opportunities to further consolidate their power and wealth at the expense of subordinate classes. It also critically examines the relationship between local forms of Islam and landed power. The volume will be of interest to scholars and researchers on Pakistan and South Asian politics, sociology and social anthropology, Islam, as also economics, development studies, and security studies.

**Terrorism Revisited** Paulo Casaca 2017-06-24 This book develops a conceptual approach to understanding the face of contemporary terrorism as manifested in the recent attacks in Mumbai and Paris. By analyzing the historical evolution of terrorism and by offering case studies on different forms of terrorism in South Asia and elsewhere, the authors shed new light on the political strategies behind terrorist attacks, as well as on the motivations of terrorists.

The case studies explore the redefinition of terrorism by the Iranian Islamic revolution, the spread of terrorism in Sunni Islam, the national jihadism in Pakistan, anti-Semitism as a main factor behind fanatical terrorist ideologies, and the case of the Tamil Tigers. "Redefining terrorism is a dynamic story that provides readers with intrigue and clarity to the ever-evolving threats that we face as a nation and as a global community. US Congressman Pete Sessions

The Politics of Refugees in South Asia Navine Murshid 2013-10-01 Partition and post-colonial migrations – sometimes voluntary, often forced – have created borders in South Asia that serve to oppress rather than protect. Migrants and refugees feel their real home lies beyond the border, and liberation struggles continue the quest for freedoms that have proven to be elusive for many. States scapegoat refugees as "outsiders" for their own ends, justifying the denial of their rights, while academic discourse on refugees represents them either as victims or as terrorists. Taking a stance against such projections, this book examines refugees' struggles for better living conditions and against marginalization. By analyzing protest and militarization among refugees, the book argues that they are neither victims without agency nor war entrepreneurs. Through interviews, surveys, and statistical analyses, it shows how states have manipulated refugee identity and resistance to promote the ideal of the nation-state, thereby creating protracted refugee crises. This is evident even in the most humanitarian state intervention in modern South Asia – India's military intervention in East Pakistan (now Bangladesh) in 1971. The findings put forward provide the basis to understand the conditions under which violence can break out, and thereby have implications for host countries, donor countries, and aid organizations in the formulation of refugee policy. The book is of interest to scholars in the fields of South Asian studies, comparative politics, international relations, refugee studies, development studies, security studies and peace studies.

Problem-Driven Political Economy Analysis Verena Fritz 2014-01-13 This volume presents eight good practice examples of problem-driven political economy analysis conducted at the World Bank, and reflect what the Bank has so far been able to achieve in mainstreaming this approach into its operations and policy dialogue.

Non-Western responses to terrorism Michael J. Boyle 2019-01-11 This edited collection surveys how non-Western states have responded to the threats of domestic and international terrorism in ways consistent with and reflective of their broad historical, political, cultural and religious traditions. It presents a series of eighteen case studies of counterterrorism theory and practice in the non-Western world, including countries such as China, Japan, India, Pakistan, Egypt and Brazil. These case studies, written by country experts and drawing on original language sources, demonstrate the diversity of counter-terrorism theory and practice and illustrate how the world 'sees' and responds to terrorism is different from the way that the United States, the United Kingdom and many European governments do. This volume – the first ever comprehensive account of counter-terrorism in the non-Western world – will be of interest to students, scholars, students and policymakers responsible for developing counter-terrorism policy.

Pakistan's Political Parties Mariam Mufti 2020-05-01 Pakistan's 2018 general elections marked the second successful transfer of power from one elected civilian government to another—a remarkable achievement considering the country's history of dictatorial rule. Pakistan's Political Parties examines how the civilian side of the state's current regime has survived the transition to democracy, providing critical insight into the evolution of political parties in Pakistan and their role in developing democracies in general. Pakistan's numerous political parties span the ideological spectrum, as well as represent diverse regional, ethnic, and religious constituencies. The essays in this volume explore the way in which these parties both contend and work with Pakistan's military-bureaucratic establishment to assert and expand their power. Researchers use interviews, surveys, data, and ethnography to illuminate the internal dynamics and motivations of these groups and the mechanisms through which they create policy and influence state and society. Pakistan's Political Parties is a one-of-a-kind resource for diplomats, policymakers, journalists, and scholars searching for a comprehensive overview of Pakistan's party system and its unlikely survival against an interventionist military, with insights that extend far beyond the region.

The Political Philosophies of Antonio Gramsci and B. R. Ambedkar Cosimo Zene 2013-10-23 Bridging two generations of scholarship on social inequality and modern political forms, this book examines the political philosophies of inclusion of subalterns/Dalits in Gramsci and Ambedkar's political philosophies. It highlights the full range of Gramsci's 'philosophy of praxis' and presents a more critical appreciation of his thought in the study of South Asian societies. Equally, Ambedkar's thought and philosophy is put to the forefront and acquires a prominence in the international context. Overcoming geographical, cultural and disciplinary boundaries, the book gives relevance to the subalterns. Following the lead of Gramsci and Ambedkar, the contributors are committed, apart from underscoring the historical roots of subalternity, to uncovering the subalterns' presence in social, economic, cultural, educational, literary, legal and religious grounds. The book offers a renewed critical approach to Gramsci and Ambedkar and expands on their findings in order to offer a present-day political focus into one of the most crucial themes of contemporary society. This book is of interest to an interdisciplinary audience, including political theory, post-colonial studies, subaltern studies, comparative political philosophy, Dalit studies, cultural

studies, South Asian studies and the study of religions.

**The Logic of Political Survival in Turkey** Çağlar Ezikoğlu 2021-02-15 This book focuses on the logic of political survival in Turkish politics by analyzing the case of Justice and Development Party (Adalet ve Kalkınma Partisi-AKP).

**Illiberal Democracy in Indonesia** David Bourchier 2014-12-17 Illiberal Democracy in Indonesia charts the origins and development of organicist ideologies in Indonesia from the early 20th century to the present. In doing so, it provides a background to the theories and ideology that informed organicist thought, traces key themes in Indonesian history, examines the Soeharto regime and his 'New Order' in detail, and looks at contemporary Indonesia to question the possibility of past ideologies making a resurgence in the country. Beginning with an exploration of the origins of the theory of the organic state in Europe, this book explores how this influenced many young Indonesian scholars and 'secular' nationalists. It also looks in detail at the case of Japan, and identifies the parallels between the process by which Japanese and Indonesian nationalist scholars drew on European romantic organicist ideas to forge 'anti-Western' national identities and ideologies. The book then turns to Indonesia's tumultuous history from the revolution to 1965, the rise of Soeharto, and how his regime used organicist ideology, together with law and terror, to shape the political landscape consolidate control. In turn, it shows how the social and economic changes wrought by the government's policies, such as the rise of a cosmopolitan middle class and a rapidly growing urban proletariat led to the failure of the corporatist political infrastructure and the eventual collapse of the New Order in 1998. Finally, the epilogue surveys the post Soeharto years to 2014, and how growing disquiet about the inability of the government to contain religious intolerance, violence and corruption, has led to an increased readiness to re-embrace not only more authoritarian styles of rule but also ideological formulas from the past. This book will be welcomed by students and scholars of Southeast Asia, politics and political theory, as well as by those interested in authoritarian regimes, democracy and human rights.

**Political Survival in Pakistan** Anas Malik 2010-10-22 Presenting a framework that incorporates macro-level forces into micro-level strategic calculations, this book explains key political choices by leaders and challengers in Pakistan through the political survival mechanism. It offers an explanation for continuing polity weakness in the country, and describes how political survival shapes the choices made by the leaders and challengers. Using a unique analysis that synthesizes theories of weak states, quasi-states and political survival, the book extends beyond rationalist accounts and the application of choice-theoretical approaches to developing countries. It challenges the focus on ideology and suggests that diverse, religiously and ethnically-defined affinity groups have interests that are represented in particular ways in weak state circumstances. Extensive interviews with decision-makers and polity-participants, combined with narrative accounts, allow the author to examine decision-making by leaders in a state bureaucratic machinery context as well as the complex mechanisms by which dissident affinity groups may support 'quasi-state' options. This study can be used for comparisons in Islamic contexts, and presents an interesting contribution to studies on South Asia as well as Political Development.

**Polycentricity, Islam, and Development** Anas Malik 2017-12-26 Touching on development, polycentric governance, and Islamic and South Asian Studies, this book argues that religiously and historically-grounded shared understandings can support productive polycentric order in Pakistan and comparable Muslim-majority developing countries.

**Resilience and Sustainability in Urban Africa** Innocent Chirisa 2021 Resilience has become a very topical issue transcending many spheres and sectors of sustainable urban development. This book presents a resilience framework for sustainable cities and towns in Africa. The rise in informal settlements is due to the urban planning practices in most African cities that rarely reflect the realities of urban life and environment for urban development. Aspects of places, people and process are central to the concept of urban resilience and sustainable urban growth. It stems from the observation that urban vulnerability is on the increase in Zimbabwe and beyond. In history, disasters have adversely affected nations across the world, inflicting wide ranging losses on one hand while on the other hand creating development opportunities for urban communities. Cooperation in disaster management is a strategy for minimising losses and uplifting the affected urban settlements. The significance of urban planning and design in the growth and development of sustainable urban centres is well documented. Urbanisation has brought with it challenges that most developing countries such as Zimbabwe are not equipped to handle. This has been accompanied by problems such as overpopulation, overcrowding, shortages of resources and the growth of slum settlements. There need is to seriously consider urban planning and design in order to come up with contemporary designs that are resilient to current urban challenges. There are major gaps in urban resilience building for instance in Harare and the local authority needs to prioritise investment in resilient urban infrastructure.

**E-Governance in India** Bidisha Chaudhuri 2014-06-05 E-Governance has been one of the strategic sectors of reform in India since late 1990s under the rubric of 'good governance' agenda promoted by International Organizations. As India's policy focus changed towards economic liberalization, deregulation and privatization proliferating domestic and foreign investment, ICT (Information Communication Technology) has been one of the leading areas for such heightened investment. Consequently, there has been a burgeoning interest in deploying ICT, in revamping the public service delivery and eventually the overall system of governance. This book analyses e-Governance in India and argues that such initiatives did not take place in isolation but followed in the footsteps of

broader governance reform agenda that has already made considerable impact on the discourses and practices of governance in India. Employing interdisciplinary methodology by combining approaches from the Political Sciences, Sociology and Postcolonial/ transcultural studies, this book presents a qualitative account of the policies and practices of e-Governance reform in India along with a detailed case study of the Common Services Centres (CSCs) Scheme under the National e-Governance Plan of the Government of India and its resultant impact on the overall system of governance. It unfolds general theoretical issues in terms of the relationship between technology and governance and the entanglement of politics, technology and culture in the complex whole of governance. This furthers our understanding of the impact of the transnational governance reform agenda on post-colonial and post-communist societies of the developing world. Making an important and original contribution to the emerging field of e-Governance and to the existing body of research on governance in general, this book will be of interest to students and scholars of Political Science, Political Sociology, South Asian Politics and Governance.

Indian Muslims and Citizenship Julten Abdelhalim 2015-10-05 Through the creation of post-colonial citizenship, India adopted a hybridisation of specific secular and western conception of citizenship. In this democratic framework, Indian Muslims are observed on how they make use of the spaces and channels to accommodate their Islamic identity within a secular one. This book analyses how the socio-political context shapes citizens' perceptions of multiple variables, such as their sense of political efficacy, agency, conception of citizenship rights and belief in democracy. Based on extensive surveys and interviews and through presenting and investigating the various meanings of *jihad*, the author explores the usage of non-Eurocentric conceptual approaches to the study of postcolonial and Muslim societies, in particular the meaning it carries in the psyche of the Muslim community. She argues that through means of argumentative and spiritual *jihad*, Indian Muslims fight their battle towards a realisation of citizenship ideals despite the unfavourable conditions of intra and inter community conflicts. Presenting new examinations of Islamic identity and citizenship in contemporary India, this book will be a useful contribution to the study of South Asian Studies, Religion, Islam, and Race and Ethnicity.

Chinese Foreign Relations with Weak Peripheral States Jeffrey Reeves 2015-10-08 This book examines China's relations with its weak peripheral states through the theoretical lens of structural power and structural violence. China's foreign policy concepts toward its weak neighbouring states, such as the 'One Belt, One Road' strategy, are premised on the assumption that economic exchange and a commitment to common development are the most effective means of ensuring stability on its borders. This book, however, argues that China's overreliance on economic exchange as the basis for its bilateral relations contains inherently self-defeating qualities that have contributed and can further contribute to instability and insecurity within China's periphery. Unequal economic exchange between China and its weak neighbours results in Chinese influence over the state's domestic institutions, what this book refers to as 'structural power'. Chinese structural power, in turn, can undermine the state's development, contribute to social unrest, and exacerbate existing state/society tensions—what this book refers to as 'structural violence'. For China, such outcomes lead to instability within its peripheral environment and raise its vulnerability to security threats stemming from nationalism, separatism, terrorism, transnational organised crime, and drug trafficking, among others. This book explores the causality between China's economically-reliant foreign policy and insecurity in its weak peripheral states and considers the implications for China's security environment and foreign policy. This book will be of much interest to students of Chinese politics, Asian security studies, international political economy and IR in general.

The China-Pakistan Economic Corridor of the Belt and Road Initiative Siegfried O. Wolf 2019-06-20 This book focuses on the implementation of the China-Pakistan Economic Corridor (CPEC), a multi-billion-dollar infrastructure development project intended to connect Asia with Europe, the Middle East and Africa. By introducing a new analytical approach to the study of economic corridors, it gauges the anticipated economic and geopolitical impacts on the region and discusses whether the CPEC will serve as a pioneer project for future regional cooperation between and integration of sub-national regions such as Balochistan, Khyber Pakhtunkhwa, the Federally Administered Tribal Areas, and Gilgit-Baltistan. Further, it explores the interests, expectations and policy approaches of both Chinese and Pakistani local and central governments with regard to the CPEC's

implementation. Given its scope, the book will appeal to regional and spatial sciences scholars, as well as social scientists interested in the regional impacts of economic corridors. It also offers valuable information for policymakers in countries participating in the Belt-and-Road Initiative or other Chinese-supported development projects.

**New Cultural Identitarian Political Movements in Developing Societies** Sebastian Schwecke 2012-12-06 Applying an intercultural and comparative theoretical approach across Asia and Africa, this book analyses the rise and moderation of political movements in developing societies which mobilise popular support with references to conceptions of cultural identity. The author includes not only the Hindu nationalist movement but also many Islamist political movements in a single category – New Cultural Identitarian Political Movements (NCIPM). Demonstrating significant similarities in the pattern of evolution between these and European Christian Democracy, the book provides an instrument for the analysis of these movements outside the parameters of the fundamentalism debate. The book looks at a number of key variables for understanding the evolution of NCIPM, and it goes on to analyse the transition of developing societies from rent-based political economies to capitalism and the (partial) failure of this transition process. It argues that there is a need to incorporate economic and class analysis in the study of political processes in developing societies against the continuing emphasis on cultural factors associated with the "cultural turn" of social sciences. The book is an interesting contribution to studies in South Asian Politics, as well as Comparative Politics.

**New Dimensions of Politics in India** Lawrence Saez 2011-09-23 Following India's general election in May 2009, this book undertakes a critical evaluation of the performance of the United Progressive Alliance (UPA). It presents a thorough analysis of the UPA coalition government, and by providing an understanding of the new innovations in the UPA's policies, the book goes on to evaluate the effectiveness of these policies against their aims and objectives. This book suggests that there is an analytical framework for assessing the political consequences of the policies and the UPA's success, both at the national and state levels, with particular reference to new policies in governance, secularism and security. These three areas constitute important fault lines between the main national political parties in India, and provide an interesting point of departure to explore the new emerging trends, as well as the strong underlying continuities between the UPA administration and its predecessors. The book offers new insights into the structure of Indian politics, and is a useful contribution to studies in South Asian Politics, Governance and Political Parties.

**Pakistan - the Political Economy of Growth, Stagnation and the State, 1951-2009** Matthew McCartney 2011-06-07 This book provides a comprehensive reassessment of the development of the economy of Pakistan from independence to the present. It argues that the factors which bring about economic development in countries with high levels of deprivation are best understood by considering changing overall approaches where shifts in approaches do not always co-incide with changes in political regimes.

**Jihad & Co.** Aisha Ahmad 2017-08-04 For two decades, militant jihadism has been one of the world's most pressing security crises. In civil wars and insurgencies across the Muslim world, certain Islamist groups have taken advantage of the anarchy to establish political control over a broad range of territories and communities. In effect, they have built radical new jihadist proto-states. Why have some ideologically-inspired Islamists been able to build state-like polities out of civil war stalemate, while many other armed groups have failed to gain similar traction? What makes jihadists win? In *Jihad & Co.*, Aisha Ahmad argues that there are concrete economic reasons behind Islamist success. By tracking the economic activities of jihadist groups in Afghanistan, Somalia, Pakistan, Mali, and Iraq, she uncovers an unlikely actor in bringing Islamist groups to power: the local business community. To illuminate the nexus between business and Islamist interests in civil war, Ahmad journeys into war-torn bazaars to meet with both jihadists and the smugglers who financed their rise to power. From the arms markets in the Pakistani border region to the street markets of Mogadishu, their stories reveal a powerful economic logic behind the rise of Islamist power in civil wars. Behind the fiery rhetoric and impassioned, ideological claims is the cold, hard cash of the local war economy. Moving readers back and forth between mosques, marketplaces, and battlefields, Ahmad makes a powerful argument that economic savvy, as much as ideological fervor, explains the rise of militant jihadism across the modern Muslim world.

**Critical Theory Today** Lois Tyson 2012-09-10 *Critical Theory Today* is the essential introduction to contemporary

critical theory. It provides clear, simple explanations and concrete examples of complex concepts, making a wide variety of commonly used critical theories accessible to novices without sacrificing any theoretical rigor or thoroughness. This new edition provides in-depth coverage of the most common approaches to literary analysis today: feminism, psychoanalysis, Marxism, reader-response theory, new criticism, structuralism and semiotics, deconstruction, new historicism, cultural criticism, lesbian/gay/queer theory, African American criticism, and postcolonial criticism. The chapters provide an extended explanation of each theory, using examples from everyday life, popular culture, and literary texts; a list of specific questions critics who use that theory ask about literary texts; an interpretation of F. Scott Fitzgerald's *The Great Gatsby* through the lens of each theory; a list of questions for further practice to guide readers in applying each theory to different literary works; and a bibliography of primary and secondary works for further reading.

**India-Iran Relations** Sujata Ashwarya 2017-04-21 This book examines India's relationship with Iran since the post-World War II period and its unique search for meaningful bilateral ties in the West Asian region in the context of the changing regional and international scenarios. The four chapters highlight the achievements and constraints on the development of Indo-Iranian relations during the Cold War era; opportunities and limitations in bilateral engagements between India and Iran in the aftermath of the Cold War; impact of the 'US factor' on the development of crucial Indo-Iranian energy ties and the limitation imposed by India's relations with Israel and Saudi Arabia on the India-Iran ties. More specifically, the four chapters touch on the central drivers—energy imports, access to Central Asia, cooperation in Afghanistan, mutual trade and economic investments and security ties—of India's Iran policy, and how they structure India's interaction with the other countries of the region and impact on the articulation of national interests. Combining a rich interplay of facts and figures with nuanced analyses, this volume will be a valuable resource for scholars, policymakers, diplomats and any interested reader desirous of knowing more about Indo-Iranian relations in particular and India's West Asia policy in general.

**Indian Politics and Society since Independence** Bidyut Chakrabarty 2008-05-12 Focusing on politics and society in India, this book explores new areas enmeshed in the complex social, economic and political processes in the country. Linking the structural characteristics with the broader sociological context, the book emphasizes the strong influence of sociological issues on politics, such as social milieu shaping and the articulation of the political in day-to-day events. Political events are connected with the ever-changing social, economic and political processes in order to provide an analytical framework to explain 'peculiarities' of Indian politics. Bidyut Chakrabarty argues that three major ideological influences of colonialism, nationalism and democracy have provided the foundational values of Indian politics. Structured thematically and chronologically, this work is a useful resource for students of political science, sociology and South Asian studies.

**Military Control in Pakistan** Mazhar Aziz 2007-10-24 This volume examines the role of the military, the most influential actor in Pakistan, and challenges conventional wisdom on the causes of political instability in this geographically important nuclear state. It rejects views that ethnic and religious cleavages and perceived economic or political mismanagement by civilian governments triggers military intervention in Pakistan. The study argues instead that the military intervenes to remove civilian governments where the latter are perceived to be undermining the military's institutional interests. Mazhar Aziz shows that the Pakistani military has become a parallel state, and given the extent of its influence, will continue to define the nature of governance within the polity. Overall, *Military Control in Pakistan* is a timely reminder and an important resource for both scholars and policy makers, clearly demonstrating the need to refocus attention on the problem of an influential military whilst drawing appropriate conclusions about issues ranging from democratic norms, political representation and civilian-military relations.

**Beyond Crisis** Naveeda Khan 2012-04-27 Through the essays in this volume, we see how the failure of the state becomes a moment to ruminate on the artificiality of this most modern construct, the failure of nationalism, an opportunity to dream of alternative modes of association, and the failure of sovereignty to consider the threats and possibilities of the realm of foreignness within the nation-state as within the self. The ambition of this volume is not only to complicate standing representations of Pakistan. It is take Pakistan out of the status of exceptionalism that its multiple crises have endowed upon it. By now, many scholars have written of how exile, migrancy, refugeedom, and other modes of displacement constitute modern subjectivities. The arguments made in the book say that Pakistan is no stranger to this condition of human immigrancy and therefore, can be pressed into service in helping us to understand our present condition.

**Vision and Strategy in Indian Politics** Jivanta Schoettli 2011-09-15 The 1950s in India were a crucial transition phase where the legacy and institutions of British rule had to be transformed to fit the needs of a post-colonial state. This period is closely associated with India's first Prime Minister, Jawaharlal Nehru (1947 – 64). Selecting three key policies closely associated with him, the book traces the political origins of the Panchasheela Agreement with China in 1954, the Hindu Code Bills of 1955 and 1956 and the founding of the Planning Commission in 1950. Each provides a window into the compulsions of Indian domestic politics at the time as well as the parameters of parliamentary debate. The book goes on to discuss how these policies correspond to the pillars of Nehru's vision for a modern, independent India that encapsulated socialism, nonalignment and secularism and assesses their long-run impact in Indian politics. With a growing recognition of the resilience of India's political arrangements, the analysis is particularly relevant to those interested in the politics of transition and modernisation, and contributes to
