How To Prevent Hair Loss And Re-Growth New Hair In A Natural Way Alan To 2021-04-08 I talked to many hair loss victims when I started writing this guide. Most of them went through all the same things you're probably going through: being selfconscious, trying different ways to hide it, feeling self-esteem fade away, wondering if people were commenting about it behind their back and make fun of them. They thought about trying different treatments like hair transplants, minoxidil,

propecia, rubbing their heads with garlic, wine...etc. anything that might give them even a slight edge in slowing down the ever-growing tangles of hair left behind in their hair brush. There are lots of old tales, most of which sound silly. There are also lots of well-meaning advice being given, none of which gave me, or the others, much hope. Most of us read and researched on the internet and spent way too much money on books and products. Some of them have helpful advice; others were just full of useless junk or are so dry and clinical that they are impossibly boring to read. I wrote this book to put together everything I learned in one easy to read and really useful book. If I can save you the endless hours of reading, researching, going down dark alleys, getting discouraged, wading through the nonsense and the hype that I went through, wouldn't it be worth it? One thing's for sure: I would have given almost anything to have all this information put together in one place for me like it is reading this book! And let's get realistic for a moment. We're all different, so something that worked for me might not work for you. That's why you'll find a variety of methods and approaches in this book. And another thing: this isn't a quick fix (unless you want to buy a hair piece - there's info on that too!). This book is about lifestyle and nutritional changes that actually work to slow down and even stop hair loss while stimulating the growth of new hair. So once you find something that resonates with you in this book, be patient and give it a dedicated try for 60 to 90 days. You didn't begin to go bald overnight, so give your system a chance to recover and get back on track by being consistent. This book provides solution to hair loss problem, including the below topics: 1. Nutrition That Makes a Difference 2. Eating Your Way to Better Hair 3. Healthy Hair Supplements 4. Home-Made Remedies That Really Work 5. Simple Healthy Hair Tips

**STOP YOUR HAIR LOSS** Mark Frey Hair Loss, One thing is sure: when it comes to it, the faster you start, the better and quicker the results will be. In this e-book I will show you the exact steps and specific directions to help you to keep your remaining hair on your head and to regain the lost hair. Why should you believe that I can help you? As you already know, there are people who try to make you believe that they have all the answers. Hair loss is no exception. I don't pretend to have all the answers, but I do know what it worked for me and for many other people who are dealing with hair loss. The procedure doesn't involve any kind of medication or expensive treatments as hair transplant. Actually all you need for this procedure, you probably already have and it's all natural. It's taken me quite some time to figure out what I'm going to share with you on this topic. Actually it has been years of trying and testing all sorts of methods, until I found out what really works when it comes to going bald. But - good news, guys: I gathered all the information in this book, so you don't have to live the maze that I lived, of finding what works to stop your hair loss and regain your full head of hair. The primary "equipment" that my book requires: heavy motivation for keeping your natural, healthy and rich hair on your head. The rest, leave it up to me. If your laziness is bigger than your desire to keep your hair on your head, please do yourself a favor and don't buy this material. Go and try all the "shortcuts" you may find. In this book, you will find the exact steps you need to do in order to keep your hair on your head. I will also offer one-to-one counseling via email, which is the only way to ensure that all your individual questions are answered. If you are doing it right, you should see results after the first week. You do need, however, to be reasonable, and make this a long-term commitment. Depending on how advanced your balding is, the recovery time may vary from individual to individual. And, I want to be honest with you - if you are completely or almost entirely bald, you will most probably need a higher amount of time for your hair to recover. But let's face it - the hair didn't go away all at once, am I right? I will recommend this treatment also to guys that didn't see any signs of going bald, but they are having relatives who are facing baldness. Prevention will keep you away from the struggle that going bald implies. My honest hope is that you get huge value from it. - Mark

The Maliniak Method Leon Maliniak 2012-04-01 Announcing A Major Break-Through In The Science Of Hair Loss And Male Pattern Baldness A radical new theory has recently been published which explains that HAIR LOSS and MALE PATTERN BALDNESS are really caused by TWO factors and not just one, as was previously thought. Stop Hair Loss and Grow New Hair with the Maliniak Method The first factor, which is the radical new element, is the third layer of the TOP of the scalp called the GALEA which becomes very "tight" in some people, disrupts ordinary blood flow to the follicles and sets in motion the sequence of events which triggers hair loss. The role of the GALEA has been debated for years, but this new theory provides the rationale for concluding that it must be involved because men only go bald in the areas where this GALEA exists and nowhere else. The second factor is still dihydrotestosterone (DHT) which this new theory now states only accumulates due to this restricted blood flow and which is still the actual "killer" of follicles, as per the conventional wisdom. Even more significantly, this theory also concludes that "dormant" follicles can in fact be revived to produce hair again contrary to everything we were previously told. The new theory is called the MALINIAK METHOD and is published by BORN AGAIN, The Alternate Science Company. More importantly, this theory also provides a simple new two-step treatment method which first relaxes the GALEA with simple massage techniques to restore proper blood flow to the top of the scalp. It then stimulates the dormant follicles to produce hair again with an electrical stimulation device which revives the use of an old established science derived from NIKOLA TESLA. It has been around for one hundred years and is still being used to this day but in other applications. It has been adopted and adapted in the MALINIAK METHOD to treat HAIR LOSS because that is one of the purposes it was used for originally. Two independent scientific studies have recently been published which confirm the validity of the TWO main premises of the MALINIAK METHOD. One of them is from the CROWN institute in Pickering, Ontario, which confirms that the GALEA is in fact involved in hair loss and male pattern baldness. It also concludes that a reduction in the oxygen going to the follicles causes DHT to be overproduced, adding another explanation for why this "tightness" of the scalp is at the root of this problem. The second study is from the University of Pennsylvania which found that certain types of STEM CELLS called "progenitor" cells are more numerous in non-bald areas and that these dormant cells can in fact be induced to become "progenitor" cells, in effect, be "revived" and induced to produce hair again, contrary to the previous knowledge and as predicted by the MALINIAK METHOD.
