Kindergarten through Grade 12 - Government of New Jersey

The New Jersey Student Learning Standards for Science (NJSL-S) describe the expectations for what students should know and be able to do as well as promote three-dimensional science instruction across the three science domains (i.e., physical sciences, life science, Earth and space sciences). From the earliest grades, the expectation is

revised K-4 Science Standards Topic Arrangement - Arkansas

Standards focus on a limited number of core ideas in science and engineering both within and across the disciplines and are built on the notion of learning as a developmental progression. The Disciplinary Core Ideas are grouped into the following domains: • Physical Science (PS) • Life Science (LS) • Earth and Space Science (ESS)

USG Acoustical Assemblies Brochure (English) - SA200

Sound is defined as a vibration in an elastic medium, that is, any material (air, water, physical object) that returns to its normal state after being deflected by an outside force such as a sound vibration. The more elastic a substance, the better it can conduct sound. Lead, for instance, is very inelastic and therefore a poor sound conductor.
